

## 6-8 Science Vocabulary List

<b>Seventh Grade</b>	<b>Eighth Grade</b>
alleles	acceleration
anatomy	acidic
asexual	astronomical
biological	atomic number
blood pressure	atomic structure
cell	average speed
cell division	balanced
cell wall	buoyant
characteristic	carbohydrates
chloroplasts	carbon
chromosomes	chemistry
circulatory	compounds
contractions	compression
deoxyribonucleic acid	constituent
differentiate	crystal
distinguish	cumulative
diversity	density
electromagnetic	elastic
evolution	electrical conductivity
extinction	electrons
fertilization	forces
generations	friction
genes	galaxies
genetic	hydrogen
inherit	inert gases
microscope	interpret
mitochondria	light year
mitosis	magnitude
muscles	mass
nucleus	Milky Way
offspring	neutrons
organs	nitrogen
ovules	nonmetals
phenotype	outer space
physiology	phosphorus

## 6-8 Science Vocabulary List

<b>Seventh Grade</b>	<b>Eighth Grade</b>
placenta	planetary
pregnancy	polymers
proteins	protons
radioactive	reactant
recessive	stars
repository	static
reproduction	sulfur
retinal	tension
sexual	thermal conductivity
tissues	unbalanced
traits	universe
umbilicus	velocity
wavelength
